

# KINGFISHER TUNNELS - DATA SHEET

## Kingfisher Tunnels

- The Osprey Kingfisher Tunnels are a multi purpose growing structure for growing strawberries, cane, bush fruits, vines, vegetables, flowers and much more.
- They are ideally suited for early to mid season and late production with the suitable chosen accessories.
- Kingfisher's can be semi-permanent or permanent structures
- Comes with our own unique retrofitted Rainbow Gutter System.
- The Kingfisher is the most adaptable tunnel system.
- The Kingfisher has a reasonable wind record, and closer hoop and leg spacing can make this structure as strong as the others.
- The Gothic hoop shape is an option with the Kingfisher to reduce snow damage.
